This Could Be Your Grandfather's Pavement

Full-depth and full-strength asphalt pavements have been constructed for decades, and continue to perform well. With modern Perpetual Pavement designs, we can optimize materials usage and the design of long-lasting pavements.

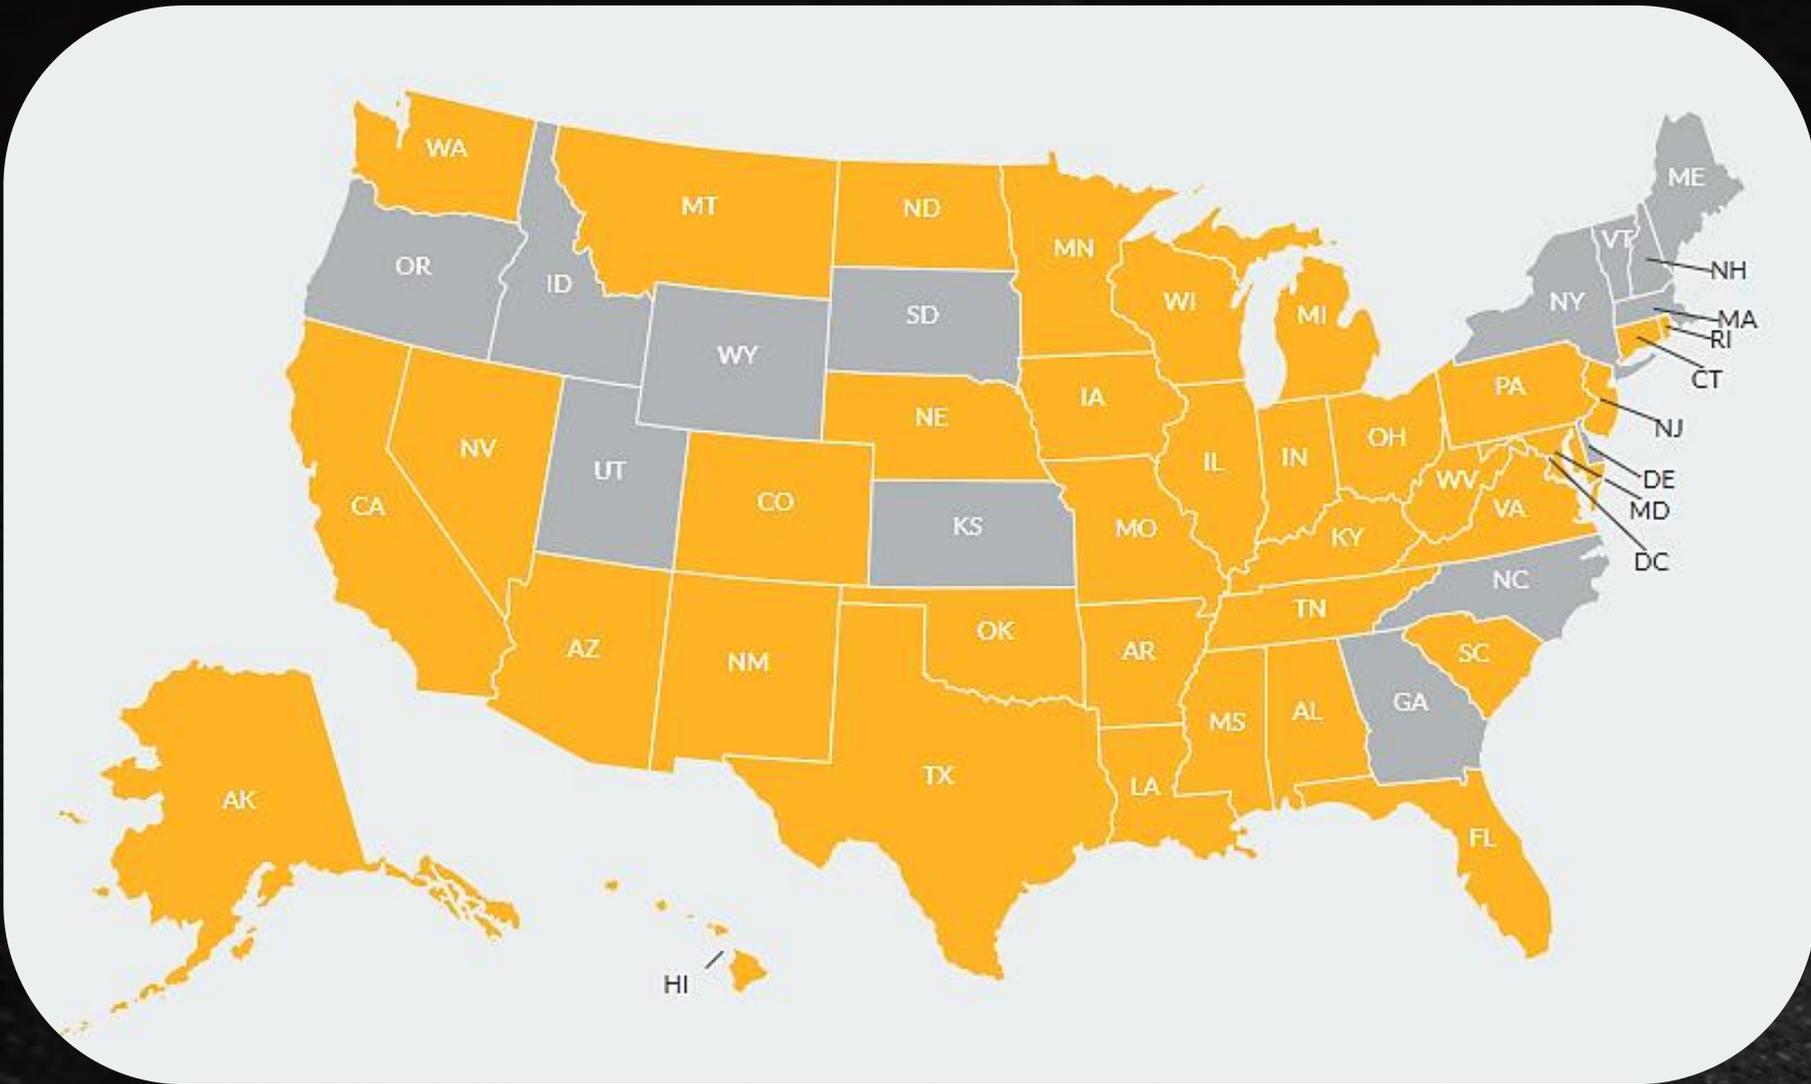

The Overachieving Pavement

The Asphalt Pavement Alliance's Perpetual Pavement Award program recognizes long-life pavements across North America that have never experienced a structural failure. Winners range in age from 35 to 75 years and average 43.25 years at the time of award...and they're still going strong.²

This award honors asphalt pavements that were designed and built with outstanding care and exceptional quality. The result is a long-lasting pavement, one that serves the traveling public well, provides true value to the taxpayers, and demonstrates both the convenience and the quality of asphalt pavements.
